

Utrecht, the Netherlands, 7th of December 2009

For immediate release: **CXO-Cockpit Hyperion Dashboard first choice of New Frontier.**

CXO Solutions, provider of the Hyperion Dashboard, CXO-Cockpit, announces that New Frontier, the largest Hyperion implementation partner and IT solutions provider in Central and Eastern Europe has chosen CXO-Cockpit as their online Hyperion Management Information platform.

In spring 2009 we selected Hyperion Financial Management as our Management information platform to consolidate and report the financial results of all our underlying companies says Günther Meyringer, CTO of New Frontier. In the first months of the implementation we started to explore the online reporting and dashboarding capabilities of HFM and we came to the conclusion that the native tools were not sufficient to satisfy our needs continues Günther Meyringer. We extended our search for a Hyperion Dashboard via Google and we quickly ran into CXO Solutions, an Oracle partner based in The Netherlands that provides CXO-Cockpit. I instantly liked what I saw, namely a simple, flexible, cheap and quick to implement Hyperion Dashboard, says Günther Meyringer.

We are very pleased and proud that as of today we can add New Frontier to our fast growing international customer list, says Jean-Pierre Quaedvlieg, Sales Director of CXO Solutions. It again proves that we have built a solid and well thought of solution that provides a valuable alternative for those Hyperion customers that are truly looking for an online Hyperion dashboard and reporting environment. We are extra excited because New Frontier is our first customer that will also become a major partner to implement our CXO-Cockpit solution. Within their own Central and Eastern European Hyperion customer base, New Frontier and its related companies will be trained to implement CXO-Cockpit themselves, finalizes Jean-Pierre Quaedvlieg.

About the CXO-Cockpit: The CXO-Cockpit is a unique pre-built yet flexible Executive Dashboard for Hyperion Financial Management (HFM), Hyperion Enterprise (HE), Hyperion Essbase, Hyperion Planning and HSF that can be implemented in just 1 week. The CXO-Cockpit provides a full range of pre-built financial dashboards and reports, including Balance Sheet, P&L statements, Cash Flow reports and Waterfall, Trend, Portfolio and Benchmark dashboards. All available dashboards provide highly interactive analysis, alerts, KPI's and rankings by entity, channel, customer, market, or any other dimension available in your Hyperion application. The CXO-Cockpit is available out of the box delivering the lowest total cost of ownership in the industry.

About the CXO-Cockpit Community: CXO Solutions delivers the CXO-Cockpit in a concept of co-creation. Its development is based on the best practices approach derived from the CXO-Cockpit Community. The CXO-Cockpit Community is a network of CFO's, finance professionals from large organizations and University professors sharing their best practices for presentation of financial data. The Community ultimately drives the further development of the CXO-Cockpit.
